As stated in my hypothesis, I believed that \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_.

The experimental data (supported/ did not support) my hypothesis, indicating  
that \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_.

# Conclusions

As stated in my hypothesis, I believed that straw would work the best to prevent soil erosion in a furrow irrigation system.

---

The experimental data (supported/ did not support) my hypothesis, indicating that when a furrow irrigation system was treated with straw, the amount of erosion would be less than soil treated with PAM or soil left untreated.
